

# 240 Volt Inverters – Power Boss HIGH SURGE MODIFIED SINE WAVE

An inverter turns the energy stored in a standard deep cycle battery into household 240volts AC power. This power can be used to run almost any AC appliance, including radio, Video, TV, kitchen appliances, power tools, medical equipment, lights, motors and basically anything that operates on 240VAC.

It must be remembered that an inverter is generally far more economical to purchase and operate than special 12 volt appliances (if available).

150 WATT	\$109
300 WATT	\$159
600 WATT	\$299
1000 WATT	\$549
1500 WATT	\$899
2500 WATT	\$1,599

## TRUE SINE WAVE INVERTERS
